

AGEBACK LIFTING SERUM

With the slow-ageing trend, Ageback lifting serum targets very essential; Cell ageing care. The main active substance Magnolia bark suppresses cell ageing process by 3 steps, 1) Inhibition of cell cycle arrest, 2) Inhibition of cell senescence, 3) Suppression of releasing the ageing related inflammatory cytokines

MAGNOSCE

- Plant-derived anti-cell ageing active
- Expect efficient slow-ageing by taking care of ageing from cell phase
- Wound healing effect by re-activation of senescent cell viability
- Revitalizes senescent cell to be involved ECM structure formulation
- Clinically proven vertical pore tightening caused by decreased elasticity
