GranLux® Polar Dispersions

Sun care today is a burning issue. Not only does the consumer expect protection against erythema, also demands for safety and natural ingredients are there. In addition recent scientific results highlight the need to use effective antioxidants to protect the skin against ageing and other skin problems.

To answer these demands Granula has developed polar dispersions utilizing highly effective physical filters together with one of the most effective natural antioxidants and skin problem preventing materials available: Picea Abies Extract (AOX). *)

Pick your choice:
