

GranLux®
dispersions for

Suncare
and
skincare

Since 1997

*Superior Sun Protection
with non penetrating UV filters*

GranLux®

USING GranLux® PARTICLE FILTER DISPERSIONS
IS AN INVESTMENT IN CONSUMER SAFETY AND
WORK PLACE ENVIRONMENT

The Patented GranLux® Concept

- gives you UV-protection based on particle filters coated and dispersed in the emulsifier system of the end product
- gives stable protection on the top of the skin

Our Technology enables

- High UVA and UVB protection according to the latest demands
- Long term stability
- Minimal chemical stress on skin and environment
- Photostability

Superior Choices for Ecological, Ethical and Natural Cosmetics

Formulation of certified natural cosmetics is no easy task. Besides technical problems also the choice of materials is heavily restricted.

To ease the task of formulation the GranLux® product line contains several products fulfilling the demands of ecological cosmetics organisations. Products are also registered with major organisations like ECOCERT.

Common demands are fulfilled:

- no synthetic materials
- no irradiated materials
- no sourcing from gene modified organisms or dead animals
- chemical modification only by esterification or condensation
- emollients also from "Controlled Biological Cultivation (EG-Bio-VO 2092/91)" sources

*Reduce the toxicity
of your formulas!*
