

# PSI™ Sunflower Wax Beads

INCI: Helianthus Annus (Sunflower Wax)

PSI™ Sunflower Wax Beads are free flowing beads composed of sunflower wax. They are hydrophobic in nature, making it ideal for use in cosmetic applications as a film former that blocks trans-epidural water loss in the stratum corneum. PSI™ Sunflower Wax Beads provide structure to many anhydrous formulations.

### Specifications:

Color: Light Yellow  
Congeal Point: 74-77°C  
Particle Size: >20Mesh —1% Max  
<40Mesh —5% Max

**Recommended Use Level:** 0.25%-5%

**Shelf Life:** 2 years

### Benefits:

- No Preservatives, Additives or Solvents Used in the Processing
- 100% Biodegradable
- Naturally White to Yellowish in Color
- Range of Bead Sizes

### Suggested Use:

- Lip Balms
- Lipsticks
- Deodorants
- Topical Exfoliant
- Visual Aesthetic in Bar Soaps and Spa Products
